This is the Annual London Instructional Course Series at Brunel University, with this year's syllabus representing Arthroplasty. Upper limb is the current topic of this course, with lower limb and spine to follow. The aim of this series is to inform delegates of all the relevant and current topics within the area of arthroplasty. It is designed for consultants who want an easy forum to remain up to date and for trainees to gain a complete overview of the topic in a compact forum.
